The Newberry Observer says "The talk of forming a Prohibition Party in South Carolina is the idlest vaporing," very true. Why should a Prohibition Party be formed? Have not the Prohibitionists practical control of the party machinery now? We believe a canvass of the State Executive Committee of the Democratic party will disclose a majority in favor of prohibition, and the same condition exists in a majority of the counties. Therefore it would be silly in them to turn lose their grip upon the machinery of the dominant party to organize a new party. But just the same there are many conscientious Prohibitionists who want to support that principle in the Democratic party if they can, but they will go out of the party to support it if they must. Therefore it will not surprise us in the least in the course of a short time for South Carolina to be organized under the auspices of the National Prohibition Party, and that it will be a party to be reckoned with when it does

The National Prohibition Party is growing, and so far as the South is concerned, it is with it in everything but name. Should an attempt be made to have national prohibition it would receive an almost solid support in Practically all of the southern states are under prohibition laws, and the Representatives sition. who value their positions would with a new party.

The people of the earth manufacture and remoid their religions and laws from time to time to meet actual conditions which confront them, and this is done in accordance with the principles of expediency, experiment and evolution. The statistics of the Federal Govern-

President Wilson can settle the Mexican problem in short order by opening the gates to allow American sympathisers into that country with arms and amunition. Carranza says he can put 100,000 men in the field if he was allowed to importarms from the United States, and it would not surprise us if he could import that many adventurous young men who will be willing to help put out the present administration for the sake of the loot which is bound to follow an invasion of foreigners.
